

**IMPORTING AND EXPORTING BIOLOGICAL MATERIALS,
EQUIPMENT AND TECHNOLOGY**

DANIEL VICK, MBA
Director, Export Controls
Duke University

DEBORAH L. DUFFICY, DVM, MPH, DACVPM
Senior Staff Officer, Organisms and Vectors Permitting
Agriculture Select Agent Services (AgSAS)
National Import Export Services
USDA, APHIS, Veterinary Services

This presentation will provide an overview of importation of USDA Veterinary Services regulated organisms and vectors. The presentation will provide resources that will help a potential applicant determine if a permit is required, provide background as to why a permit is required, describe various methods used to mitigate risks and provide information on new policies or requirements (as applicable).

JODI L KOUTS
Senior Export Policy Analyst
Office of Nonproliferation and Treaty Compliance
Chemical and Biological Controls Division
U.S. Department of Commerce

This presentation will focus on all aspects of export controls related to biological material, equipment and technology. This will include the genesis of such controls and risks associated with biologicals. The main focus will be on complying with the Export Administration Regulations, including a discussion on fundamental research. Numerous case study scenarios will be reviewed based on real situations presented to the U.S. Government.
