Curriculum Crosswalk

This crosswalk is intended to show many of the possible connections between the Rx for Science Literacy manual and the standards across many of the curricula areas taught in the state of North Carolina. This manual contains many lessons that strengthen the knowledge of biomedical research. The lessons in this manual may be taught sequentially or independently. The materials provided in the manual are the basis for the lessons. Teachers are expected to make the necessary adjustments to these lesson plans to meet the needs of their students.

Unit I-Chapter 1
What is Science?

Next Generation Science Standards

- **MS-ESS3-3.** Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.
- **MS-ETS1-1.** Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
- **MS-ETS1-2.** Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.
- **MS-ETS1-3.** Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
- **MS-ETS1-4.** Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.
- **HS-ETS1.1.** Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants.
- **HS-ETS1.2.** Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.
- **HS-ETS1.3.** Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.
- **HS-ETS1.4.** Use a computer simulation to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem.
- **HS-LS2-7.** Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.
- **HS-ESS3-1.** Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.

North Carolina Essential Standards for Science

- Science as Inquiry
- **8.L.2** Understand how biotechnology is used to affect living organisms.
- **Bio.2.2** Understand the impact of human activities on the environment (one generation affects the next).
Curriculum Crosswalk

Common Core State Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects

- Reading Standards for Informational Text 1, 2, 3 and 4 for Third grade to Twelfth grade
- Writing Standards Text Types and Purposes 1 for Kindergarten to Twelfth grade
- Speaking and Listening Standards Comprehension and Collaboration 1, 2 and 3 for Kindergarten to Twelfth grade
- Speaking and Listening Standards Presentation of Knowledge and Ideas 4, 5 and 6 for Kindergarten to Twelfth grade

North Carolina Essential Standards for Social Studies

- 6.H.2 Understand the political, economic and/or social significance of historical events, issues, individuals and cultural groups.
- 7.H.2 Understand the implications of global interactions.

Career and Technical Education Course Blueprint Competencies

- Exploring Animal and Plant Science
  » AU022YB 5.00 Analyze the fundamental components of biotechnology.
- Exploring Agricultural Issues
  » AU022YD 8.02 Understand concepts and issues related to biotechnology and other emerging technologies in the agricultural industry.
- Foundations of Health Science
  » HU10 2.03 Research men and women who made historical contributions to health care.
- Biomedical Technology
  » HB11 1.00 Understand biomedical research.
- Agriscience Applications
  » AU10 4.02 Understand biotechnology in the animal industry.

AP Biology

- Science Practice 1 Concept Explanation
- Science Practice 2 Visual Representation
- Science Practice 4 Representing and Describing Data

Unit I-Chapter 2
What is Biomedical Research?

Next Generation Science Standards

- MS-ESS3-3. Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.
- MS-ETS1-1. Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
- MS-ETS1-2. Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.
- MS-ETS1-3. Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
Curriculum Crosswalk

- **MS-ETS1-4.** Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.
- **HS-ETS1.1.** Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants.
- **HS-ETS1.2.** Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.
- **HS-ETS1.3.** Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.
- **HS-ETS1.4.** Use a computer simulation to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem.
- **HS-LS1-1.** Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.
- **HS-LS1-2.** Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.
- **HS-LS1-3.** Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.
- **HS-LS2-7.** Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.
- **HS-ESS3-1.** Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.

**North Carolina Essential Standards for Science**

- Science as Inquiry
  - **3.L.1** Understand human body systems and how they are essential for life: protection, movement and support.
  - **4.L.2** Understand food and the benefits of vitamins, minerals and exercise.
  - **5.L.1** Understand how structures and systems of organisms (to include the human body) perform functions necessary for life.
  - **7.L.1** Understand the processes, structures and functions of living organisms that enable them to survive, reproduce and carry out the basic functions of life.
  - **7.L.2** Understand the relationship of the mechanisms of cellular, patterns of inheritance and external factors to potential variation among offspring.
  - **8.L.1** Understand the hazards caused by agents of diseases that affect living organisms.
  - **8.L.2** Understand how biotechnology is used to affect living organisms.
  - **Bio.2.2** Understand the impact of human activities on the environment (one generation affects the next).
  - **Bio.4.1** Understand how biological molecules are essential to the survival of living organisms.

**Common Core State Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects**

- Reading Standards for Informational Text 1, 2, 3 and 4 for Third grade to Twelfth grade
- Writing Standards Text Types and Purposes 1 for Kindergarten to Twelfth grade
- Speaking and Listening Standards Comprehension and Collaboration 1, 2 and 3 for Kindergarten to Twelfth grade
- Speaking and Listening Standards Presentation of Knowledge and Ideas 4, 5 and 6 for Kindergarten to Twelfth grade
Curriculum Crosswalk

North Carolina Essential Standards for Social Studies

- **6.H.2** Understand the political, economic and/or social significance of historical events, issues, individuals and cultural groups.
- **7.H.2** Understand the implications of global interactions.

Career and Technical Education Course Blueprint Competencies

- Exploring Animal and Plant Science
  » **AU022YB 5.00** Analyze the fundamental components of biotechnology.
- Exploring Agricultural Issues
  » **AU022YD 8.02** Understand concepts and issues related to biotechnology and other emerging technologies in the agricultural industry.
- Exploring Healthcare Diagnostic Careers
  » **HU052YD 4.01** Identify structures and functions of the cardiovascular system.
- Biomedical Technology
  » **HB11 1.00** Understand biomedical research.
- Agriscience Applications
  » **AU10 4.02** Understand biotechnology in the animal industry.

AP Biology

- **Science Practice 1** Concept Explanation
- **Science Practice 2** Visual Representation
- **Science Practice 4** Representing and Describing Data

Unit I-Chapter 3
Biomedical Research Methods

Next Generation Science Standards

- **MS-LS1-3.** Use argument supported by evidence for how the body is a system of interacting subsystems composed of groups of cells.
- **MS-ESS3-3.** Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.
- **MS-ETS1-1.** Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
- **MS-ETS1-2.** Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.
- **MS-ETS1-3.** Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
- **MS-ETS1-4.** Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.
- **HS-LS1-1.** Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.
- **HS-LS1-2.** Develop and use a model to illustrate the hierarchical organization of interactingsystems that provide specific functions within multicellular organisms.

### Unit III-Chapter 1

#### Critical Thinking

**Next Generation Science Standards**

- **MS-ESS3-3.** Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.
- **MS-LS1-4.** Use argument based on empirical evidence and scientific reasoning to support an explanation for how characteristic animal behaviors and specialized plant structures affect the probability of successful reproduction of animals and plants respectively.
- **MS-ETS1-1.** Define the criteria and constraints of a design problem with sufficient precision to ensure a successful solution, taking into account relevant scientific principles and potential impacts on people and the natural environment that may limit possible solutions.
- **MS-ETS1-2.** Evaluate competing design solutions using a systematic process to determine how well they meet the criteria and constraints of the problem.
- **MS-ETS1-3.** Analyze data from tests to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.
- **MS-ETS1-4.** Develop a model to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.
- **HS-ETS1.1.** Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants.
- **HS-ETS1.2.** Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.
- **HS-ETS1.3.** Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.
- **HS-ETS1.4.** Use a computer simulation to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem.
- **HS-LS1-1.** Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.
- **HS-LS2-7.** Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.
- **HS-ESS3-1.** Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.
- **HS-ESS3-4.** Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.
## North Carolina Essential Standards for Science

- **Science as Inquiry**
- **7.L.1** Understand the processes, structures and functions of living organisms that enable them to survive, reproduce and carry out the basic functions of life.
- **7.L.2** Understand the relationship of the mechanisms of cellular reproduction, patterns of inheritance and external factors to potential variation among offspring.
- **8.L.1** Understand the hazards caused by agents of diseases that affect living organisms.
- **8.L.2** Understand how biotechnology is used to affect living organisms.
- **Bio.3.2** Understand how the environment, and/or the interaction of alleles, influences the expression of genetic traits.
- **Bio.3.3** Understand the application of DNA technology.
- **Bio.4.1** Understand how biological molecules are essential to the survival of living organisms.

## Common Core State Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects

- Speaking and Listening Standards Comprehension and Collaboration 1, 2 and 3 for Fifth grade to Twelfth grade
- Speaking and Listening Standards Presentation of Knowledge and Ideas 4, 5 and 6 for Fifth grade to Twelfth grade

## Career and Technical Education Course Blueprint Competencies

- Exploring Animal and Plant Science
  - **AU022YB 5.00** Analyze the fundamental components of biotechnology.
- Exploring Agricultural Issues
  - **AU022YD 8.02** Understand concepts and issues related to biotechnology and other emerging technologies in the agricultural industry.
- Biomedical Technology
  - **HB11 1.00** Understand biomedical research.
  - **HB11 2.00** Understand the use and care of animals in biomedical research.
  - **HB11 3.03** Genetically Modified Organisms
- Agriscience Applications
  - **AU10 4.02** Understand biotechnology in the animal industry.

## AP Biology

- **Science Practice 1** Concept Explanation
- **Science Practice 2** Visual Representation
- **Science Practice 4** Representing and Describing Data

## Unit III-Chapter 2

### Animal Research: Issues and Answers

**Next Generation Science Standards**

- **HS-ETS1.1.** Analyze a major global challenge to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants
- **HS-ETS1.2.** Design a solution to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.
Curriculum Crosswalk

• HS-ETS1.3. Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.
• HS-ETS1.4. Use a computer simulation to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem.
• HS-LS1-1. Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.
• HS-LS2-7. Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.
• HS-LS3-1. Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.
• HS-ESS3-1. Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.
• HS-ESS3-4. Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.

North Carolina Essential Standards for Science
• Science as Inquiry
  • Bio.3.3 Understand the application of DNA technology.
  • Bio.4.1 Understand how biological molecules are essential to the survival of living organisms.

Common Core State Standards for English Language Arts & Literacy in History/Social Studies, Science, and Technical Subjects
• Reading Standards for Informational Text 1, 2, 3 and 4 for Ninth grade to Twelfth grade
• Speaking and Listening Standards Comprehension and Collaboration 1, 2 and 3 for Ninth grade to Twelfth grade
• Speaking and Listening Standards Presentation of Knowledge and Ideas 4, 5 and 6 for Ninth grade to Twelfth grade

Career and Technical Education Course Blueprint Competencies
• Exploring Animal and Plant Science
  » AU022YB 5.00 Analyze the fundamental components of biotechnology.
• Exploring Agricultural Issues
  » AU022YD 8.02 Understand concepts and issues related to biotechnology and other emerging technologies in the agricultural industry.
• Biomedical Technology
