

Inquiry with Impact: A Streamlined Process for PBL

Discover CERTL's inquiry-based approach to learning that aims to increase teacher effectiveness through reproducible strategies that engage and motivate students to achieve. Not sure how to facilitate PBL in your classroom? In this model, teachers use inquiry-based learning scenarios and embedded lab activities to deliver content in a real-world context that develop students' critical thinking skills. Opportunities to differentiate and spark student-led discussions are managed through flexible facilitation schedules and playlists using your existing curricula and provided activities. During this workshop, participants will experience a hands-on student inquiry, gain support with customizing their own scenario-based lessons and receive takeaways.

Presentation Target

Middle School

Presenter(s)

1. Stan Hill, Director, Center of Excellence for Research, Teaching and Learning, Wake Forest University School of Medicine
