

STEM 101: Exploring the Basics

STEM Made Simple

In this workshop, participants will learn just how easy and accessible STEM learning can be for any subject area. Participants will engage in hands-on, project-based STEM learning opportunities that infuses areas of all four core subject areas (mathematics, science, literacy and social studies).

By creating synergy across subject areas using STEM, educators can increase student interest in their content area and bridge gaps in learning and understanding. This workshop will address diversity, equity and inclusion because it will demonstrate that STEM is for EVERYONE regardless of age, race, disability, ethnic background or budget. This workshop will increase accessibility to STEM through the use of low-cost, budget-friendly materials and high-quality, rigorous content.

Presentation Target:

Middle School

Presenter(s):

1. Sheneika Simmons, Consultant, Simmons Leadership Services
