

STEM for All: How to Make STEM Communication Inclusive for All

Participants will learn more about FUTURES (Featuring Underrepresented Talent in Urban and Rural Engagement with Science), an exciting and innovative statewide initiative that uses the students, faculty and staff of community colleges to broaden the public's understanding of the possibilities within the STEM field. Through the provision of training in effective science outreach and engagement practices, in partnership with UNC Morehead Planetarium and Science Center, the presenters will share how the use of storytelling is helping to increase interest in STEM careers across the educational pipeline especially among rising scholars from traditionally underrepresented backgrounds.

Presentation Target:

Higher Education

Presenter(s):

1. Chris J. Harried, Community Engagement Coordinator, Morehead Planetarium and Science Center, UNC Chapel Hill
