

Hands-On, Minds-On Instructional Practices

Better Together: How to Integrate STEM into Special Areas

Our specialist team of four teachers will share the practical ways that they collaborate to include STEM in Media, P.E., and Art/Music. Participants will learn how to create PBLs that will involve all students (K-5 and EC) across areas that don't usually work together and have the students asking what next? Together, we have integrated our subject areas to create PBLs for Veterans, Poetry, SEL, Holidays, Olympics, CSI and a Year-End Celebration, just to name a few.

Administrators will see the value of shared planning time for specialists and how learning can be maximized in an innovative way.

Presentation Target:

Elementary School

Presenter(s):

1. Susan Newman, STEM Specialist
2. Kayla Fadden, Hendersonville Elementary School
3. Josh Dunkin, Hendersonville Elementary School
4. Candice Greedy, Hendersonville Elementary School
