

NC STEM Education Plan for 2035: What Are Your Ideas?

The presentation summarizes the NC STEM Education Plan for 2035, led by the NC Science, Mathematics, and Technology Education Center. The STEM Plan calls for education system transformations that need to take place so that high-quality STEM education can finally scale across NC. It also calls for a system redesign that includes the sophistication needed to respond to well-documented structural inequities – geographic, social, economic. During most of the presentation, small role-alike groups discuss ideas for system changes needed to allow STEM learning to flourish. Participants learn about the NC STEM Plan, have invigorating discussions, and contribute to state-level policy discussions.

Presentation Target:

High School

Presenter(s):

1. Malinda Faber, Research Scholar, The Friday Institute for Educational Innovation, NC State University
2. Sam Houston, President and Chief Executive Officer, North Carolina Science, Mathematics, and Technology Education Center
3. Akua Carraway, Senior Program Associate, North Carolina Science, Mathematics, and Technology Education Center
