

## STEM FOR ALL

**Name of Submitter:** Michelle Ellis

**Submitter Email:** totalstemteach@gmail.com

### **Equity, Diversity and Inclusion in STEM Education: Examples of Action**

Educators must build bridges of learning by using instructional practices that are relevant to students' needs. In this session, participants will see examples of how educators have successfully implemented student-centered and culturally-relevant strategies in their STEM classrooms. The STEM Educators for Equity and Diversity (SEED) Fellows have completed a year-long professional learning opportunity in which they have implemented elements of Inclusion, Diversity, Equity and Access (IDEA). Participants will see how both formal and informal educators across North Carolina have enhanced IDEA through STEM content, instructional delivery and professional development in their schools or organizations.

### **Presentation Target:**

Middle School

### **Presenter(s):**

1. Michelle Ellis, Academic Facilitator
