Coding Across the Curriculum Through Mini-Challenges

This presentation shares easy-to-implement strategies for coding across the curriculum. The participants will experience a mini-challenge that incorporates different academic areas centered around coding to produce a product. The session will allow participants to see how using a real-world skill for the 21st century can benefit their students in all academic areas.

Presentation Target:

Middle School

Presenter(s):

1. Matthew Lococo, Teacher (Coding and Computer Science), Greene County Schools
