Five Practical Ways to Include Artificial Intelligence: Ethics, Critical Thinking, Diversity and Career Connections in the Grades 5-12 Classroom

Curious about the impact of Artificial Intelligence tools like ChatGPT and Bard? Wondering how to effectively incorporate these technologies in the classroom? Love it or hate it, AI is here to stay just like calculators, computers and smartphones. Join us for an exciting presentation that explores AI's limitless possibilities in the classroom. Discover how these tools can ignite curiosity among students, provide personalized learning experiences and industry connections. Learn how to guide students in the ethical use of AI, encouraging critical thinking and responsible information sourcing while incorporating diverse perspectives and fostering inclusivity. Opportunity knocks. Answer by helping shape the future of education with AI!

Presentation Target:

Middle School

Presenter(s):

1. Moni Singh, Founder & CEO at STEM For Kids
2. Shelby VanBlon, Vice President of Operations at STEM For Kids
