The STEM Success Formula: Unlocking the Hidden Concepts and Skills for Thriving STEM Careers

This presentation reveals the key to succeeding in STEM careers, based on insightful podcast interviews with STEM professionals. By analyzing their experiences, we uncover the essential skills that lead to success and explore how educators can support students in pursuing these careers. Unfortunately, many students lack access to information and resources, hindering their awareness and interest in STEM. To bridge this gap, we can empower underserved students by sharing the strategies employed by successful professionals. Armed with this knowledge, educators can cultivate students' talents and lay a strong foundation for a fulfilling STEM career.

Presentation Target:

High School

Presenter(s):

1. Morgan Pittman, Instructional Designer & Curriculum Specialist, North Carolina School of Science and Math
2. Candice Chambers, Teacher Development Specialist, North Carolina School of Science and Math
