Hacking Hysteria: Effective Cross-Curricular PBL in AP Courses

Have you wanted to explore Project-Based learning, but you've been reluctant to try because your curriculum is overwhelming? Do you want to work with colleagues in other departments, but you're never able to find the time to make it happen? PBL is possible in AP classrooms! Come hear how AP Biology and AP Language and Composition teachers came together to develop a highly effective and engaging PBL unit for students that allowed them to master content area standards from both courses. You also will learn and practice strategies for collaboration and planning to incorporate cross-curricular PBL in your classroom.

Presentation Target:

High School

Presenter(s):

1. Cassandra McClellan, Teacher, Wake County Public School System
2. MK Baker, Teacher, Wake County Public School System
