Curiosity-Driven Classrooms: Making Learning Student-Led with a Driving Question Board

In this session, you will explore how a Driving Question Board (DQB) transforms classrooms by putting students at the center of learning. We will discuss what a DQB is, its benefits for fostering inquiry, collaboration, formative assessment, and critical thinking, and how it empowers students to drive their own learning. Learn practical strategies for introducing a DQB in your first lesson, from generating meaningful questions to organizing them. Finally, we'll explore how to integrate and revisit the DQB throughout a unit, keeping students engaged and focused on exploring answers to their own inquiries.

Presentation Target:

Middle School & High School

Presenter(s):

1. Mark Picardo, Consultant, Stile Education
