Presentation Title: Having Fun with the M In STEM

Do you want to have fun and teach math at the same time? Having Fun with the M in STEM offers educators an engaging exploration of mathematics through interactive activities. Participants will engage in hands-on exercises that demonstrate how math concepts can be taught in enjoyable and accessible ways, aiming to inspire both students and teachers. Attendees can expect to leave with practical strategies and resources to make math instruction more dynamic and relatable, fostering a positive learning environment that highlights the fun aspects of mathematics. This session is designed to empower educators to transform their math classrooms into spaces of creativity and enthusiasm.

Presentation Target:

Middle School
