

Rx for Science Literacy: The What, Where, How and Why of Health Science Research

Teacher's Manual

Developed by

North Carolina Association *for*
BIOMEDICAL RESEARCH

Funded by

Funded in part by

**North Carolina
Biotechnology Center**

WFIRM

Wake Forest Institute for
Regenerative Medicine

The mission of the North Carolina Association for Biomedical Research is to provide support for and promote public understanding of bioscience research.

Founded in 1989 by North Carolina's leading bioscience research institutions, NCABR is the only organization in the state dedicated to advancing all North Carolinians' appreciation for the remarkable benefits of bioscience research and careers.

As a statewide nonprofit organization, NCABR's members include academia, industry, government, nonprofit research organizations and professional societies.

NCABR plays a leading role in North Carolina and the nation by providing objective, timely and authoritative advice and information to students and educators, representatives from government and the media, as well as members of the research community and the general public.

Since 1989, NCABR has launched innovative science education outreach programs and has designed a variety of bioscience education and career-related publications — many of which are the first of their kind in the country and now are used nationally.

Unit I — Biomedical Research

	Contents	Activity Type	Page	
Unit I-Chapter 1	What is Science?			
	What is Science?	Teacher’s Notes	1.1	
	What is Science?	Reference	1.3	
	Great “Truths”	Handout	1.7	
	What is a Scientist?	Lesson Plan	1.9	
	Super Scientists	Lesson Plan	1.10	
	Some Biological Scientists, Their Discoveries and Trends	Handouts	1.11	
	How Observant are You?	Lesson Plan	1.14	
	Think Creatively!	Lesson Plan	1.16	
	Who Weaves the Fabric of Science?	Lesson Plan	1.17	
	Unit I-Chapter 2	What is Biomedical Research?		
		What is Biomedical Research?	Teacher’s Notes	2.1
		What is Basic Biomedical Research?	Reference	2.2
Basic Heart Facts		Handout	2.4	
Heart Throbs		Lesson Plan/Handout	2.7	
Effects of Food and Exercise		Lesson Plan/Handout	2.11	
What is Applied Research?		Reference	2.14	
What is Clinical Research?		Reference	2.15	

Unit I — Biomedical Research

(continued)

	Contents	Activity Type	Page
Unit I-Chapter 3	Biomedical Research Methods		
	Biomedical Research Methods	Teacher’s Notes	3.1
	Biomedical Research Methods	Handout	3.3
	Chemical, Mechanical and Mathematical Models	Reference	3.4
	<i>In Vitro</i> Studies	Reference	3.6
	Nonhuman Animal Models	Reference	3.8
	The Heart Stopper	Lesson Plan/Handout	3.11
	Itchy Sleep Disease	Lesson Plan	3.15
	Human Clinical Trials	Reference	3.17
	Human Clinical Studies	Lesson Plan	3.20
	Clinical Studies	Handout	3.21
	Epidemiological Studies	Reference	3.23
	Disease Modeling	Lesson Plan/Handout	3.27
	Cholera and the Scientific Method	Lesson Plan	3.30
	“Cholera Victims” Cholera and the Scientific Method	Handout	3.35
	“Investigators” Cholera and the Scientific Method	Handout	3.36
	Who Can Cure Our Mystery Disease?	Lesson Plan	3.37
	You Choose the Test!	Lesson Plan/Handout	3.40

Unit II — Care and Use of Animals in Biomedical Research

Contents	Activity Type	Page
Unit I-Chapter 4		
Benefits of Biomedical Research		
Benefits of Biomedical Research	Teacher’s Notes	4.1
Team IDEA Webbing	Lesson Plan/Handout	4.4
Did You or Will You Ever?	Lesson Plan/Handout	4.8
What Difference Has Biomedical Research Made to Human Health?	Reference	4.12
Biomedical Research Advances	Handout	4.22
Human Vaccines Developed Through Biomedical Research	Handout	4.23
What a Difference Biomedical Research Makes	Lesson Plan/Handout	4.25
Polio: A Success Story	Reference	4.36
History of Polio	Reference	4.38
AIDS: A Need for Continuing Research	Reference	4.42
The Continuing Search: AIDS	Lesson Plan/Handout	4.45
Biomedical Research Advances That Benefit Animals	Handout	4.53
Biomedical Research for Animal Health	Reference	4.54
Unit II-Chapter 1		
Student Surveys		
Student Surveys	Teacher’s Notes	1.1
Pre-Survey: The Use of Animals in Biomedical Research	Lesson Plan/Handout	1.2
Student Attitude Survey	Lesson Plan/Handout	1.5

Unit II — Care and Use of Animals in Biomedical Research

Contents	Activity Type	Page
Unit II-Chapter 2	Why Use Animals?	
Why Use Animals?	Teacher’s Notes	2.1
Why Use Animals?	Reference	2.2
Use of Animals in Biomedical Research	Lesson Plan/Handout	2.4
Animal Pictures	Handout	2.6
Use of Animals in Biomedical Research —		
Teacher’s Guide	Reference	2.7
Most Commonly Used Animal Models	Reference	2.8
Animals Studied for Their Unique Characteristics	Reference	2.9
Unit II-Chapter 3	Advances Based on Animal Research	
Advances Based on Animal Research	Teacher’s Notes	3.1
Research Animals Used to Make Some Major Medical Advances.	Handout	3.3
Without Animal Research...	Reference	3.4
Research Partners	Reference	3.7
Milestones in Biomedical Research Benefiting Humans and Animals	Handout	3.12
Human and Animal Health Have Come a Long Way	Lesson Plan	3.17
Unit II-Chapter 4	Number and Species of Animals Used	
Number and Species of Animals Used	Teacher’s Notes	4.1
Number and Species of Animals Used in Biomedical Research	Reference	4.2
Become an Expert	Lesson Plan	4.5

Unit II — Care and Use of Animals in Biomedical Research (continued)

Unit II-Chapter 5	Contents	Activity Type	Page
	Care of Research Animals		
	Care of Research Animals	Teacher’s Notes	5.1
	Caring for Research Animals	Handout	5.2
	Laws, Regulations and Guidelines		
	Governing Animal Research	Reference	5.4
	Responsibilities of an Institutional		
	Animal Care and Use Committee	Handout	5.8
	Institutional Animal Care and		
	Use Committee	Lesson Plan	5.10
	IACUC Research Proposals		
	for Review	Handout	5.12
	IACUC Research Proposals for		
	Review — Teacher’s Guide	Lesson Plan	5.14

Unit III — Challenges to Biomedical Research

Unit III-
Chapter 1

	Critical Thinking		
	Critical Thinking	Teacher’s Notes	1.1
	What Do You Believe?	Lesson Plan/Handout	1.3
	What’s Fact? What’s Opinion?	Lesson Plan	1.8
	Biomedical Research and the		
	Use of Animals: Fact vs. Myth	Lesson Plan	1.10
	Sample Headlines	Handout	1.13
	The Role of Animals in Society	Lesson Plan	1.14
	Are You Affected?	Lesson Plan	1.16
	Communicating Scientific Facts:		
	GMOs and You	Lesson Plan/Handout	1.18

Unit III — Challenges to Biomedical Research (continued)

Contents	Activity Type	Page
Unit III-Chapter 2		
Animal Research: Issues and Answers		
Animal Research: Issues and Answers	Teacher’s Notes	2.1
Animal Research vs. Animal Rights	Reference	2.3
Issues and Answers	Reference	2.12
Science and Self-Doubt	Reference	2.25
Public Opinion Poll: American Beliefs	Reference	2.35
Case Studies in Bioethics:		
Animal Research vs. Animal Rights	Lesson Plan/Handout	2.36
Case Studies in Trust of the Scientific Method: Are Vaccines Safe?		
Method: Are Vaccines Safe?	Lesson Plan/Handout	2.40
Unit III-Chapter 3		
Transgenic Animals		
Transgenic Animals	Teacher’s Notes	3.1
Transgenic Animals	Reference	3.2
Changing Animal Models	Lesson Plan/Handout	3.9
Unit III-Chapter 4		
Therapeutic vs. Reproductive Cloning: Scientific Realities, Public Controversy		
Therapeutic vs. Reproductive Cloning: Scientific Realities, Public Controversy		
Therapeutic vs. Reproductive Cloning: Scientific Realities, Public Controversy	Teacher’s Notes	4.1
Therapeutic vs. Reproductive Cloning: Scientific Realities, Public Controversy		
Therapeutic vs. Reproductive Cloning: Scientific Realities, Public Controversy	Reference	4.2
Bioethical Debate	Lesson Plan	4.9
A Forum on Human Cloning	Handout	4.10
Unit IV — Other Issues in Science		
Unit IV-Chapter 1		
Careers in the Biosciences		
Careers in the Biosciences	Teacher’s Notes	1.1
Becoming a Bioscientist	Reference	1.3
Curiosity is the Key to Discovery	Lesson Plan/Handout	1.12
Bioscience Careers	Reference	1.15
Looking Ahead: Careers	Lesson Plan/Reference/Handout	1.18
Job Hunting in the Biosciences	Lesson Plan	1.23
Resources	Reference	1.24

Unit IV — Other Issues in Science

(continued)

	Contents	Activity Type	Page	
Unit IV- Chapter 2	Genetics Primer			
	Genetics Primer	Teacher’s Notes	2.1	
	It’s All in the Genes	Handout	2.3	
	Mendel’s Rules — Dominant and Recessive Genes	Lesson Plan/Handout	2.17	
	Extracting DNA	Lesson Plan/Handout	2.25	
	Resources	Reference	2.28	
	Editing Life’s Instructions	Reference	2.31	
	CRISPR — A Tool to Edit Life’s Instructions	Reference	2.32	
	Virtual Fieldtrip — Explore CRISPR and Sickle Cell	Lesson Plan/Handout	2.44	
	Explore CRISPR Steps with CRISPR Associated Proteins and CRISPR 3D	Lesson Plan	2.47	
	Visualizing CRISPR	Lesson Plan/Handout	2.49	
	CRISPR: What Could A Tree Be?	Lesson Plan	2.53	
	Unit IV- Chapter 3	Nanobiotechnology		
		Nanobiotechnology	Teacher’s Notes	3.1
		Nanobiotechnology	Reference	3.3
		How Big or is it How Small?	Lesson Plan/Handout	3.13
Tools and Techniques for the Nanoworld		Lesson Plan/Handout	3.23	
Nanomanufacturing		Lesson Plan/Handout	3.30	
The Ethics of Nanotechnology		Lesson Plan/Handout	3.36	
Nanotechnology Reading		Lesson Plan/Handout	3.42	

Unit IV — Other Issues in Science

(continued)

	Contents	Activity Type	Page
Unit IV- Chapter 4	Regenerative Medicine		
	Regenerative Medicine	Teacher’s Notes	4.1
	Key Vocabulary		4.4
	Healing Promise	Reference	4.8
	Regenerative Medicine: Changing Life	Lesson Plan and Handout	4.12
	Background Science	Reference	4.20
	Ethical and Societal Issues in Regenerative Medicine	Reference	4.38
	May I Conduct This Research?	Lesson Plan and Handout	4.43
	Discover the Scaffolding of Tissue	Lesson Plan and Handout	4.52
	Building Better Tissue	Lesson Plan and Handout	4.63
	Stem Cells Are All the Same... Aren’t They?	Lesson Plan and Handout	4.70
	What Makes an Organoid an Organoid?	Lesson Plan and Handout	4.79
	BOC for a Disease	Lesson Plan and Handout	4.88
	Regenerative Medicine in Space	Reference	4.97
	Look Up	Lesson Plan and Handout	4.103
	AI and Regenerative Medicine	Reference	4.112
	ABCs of AI for RM	Lesson Plan and Handout	4.119
	Regenerative Medicine: Buy My Treatment	Lesson Plan and Handout	4.125
	Careers in Regenerative Medicine	Reference	4.132
	Unit IV- Chapter 5	New Technologies in Vaccines	
New Technologies in Vaccines		Teacher’s Notes	5.1
New Technologies in Vaccines		Reference	5.3
Why Vaccines?		Lesson Plan	5.15
Population Changes		Lesson Plan/Handout	5.31
Culturing Cells		Lesson Plan/Handout	5.40
Plant-Based Vaccines: Coming to a Disease Near You		Lesson Plan/Handout	5.46
Will this Vaccine Work?		Reference/Lesson Plan/Handout	5.53

Acknowledgments

NCABR extends special thanks to many organizations, past and present, that helped develop this manual and provided assistance. To our colleagues at each of the following organizations, we offer our gratitude:

AALAS Foundation	incurably ill for Animal Research
Americans for Medical Progress	ManTech Environmental Technology Inc.
American Cancer Society, N.C. Division Inc.	Massachusetts Biotechnology Research Institute
American Heart Association, N.C. Affiliates Inc.	Massachusetts Society for Medical Research
American Lung Association of North Carolina	National Clearinghouse for Alcohol and Drug Information
American Medical Association	National Institute of Allergy and Infectious Diseases
American Society for Microbiology	National Institute on Drug Abuse
Atrium Health Wake Forest Baptist Biogen	National Institute of Environmental Health Sciences
Cannon Medical Research Center	National Institute of Mental Health
Centers for Disease Control and Prevention	North Carolina Biotechnology Center
Charles River Foundation	North Carolina Department of Public Instruction
CIIT Centers for Health Research	North Carolina Farm Bureau Federation Inc.
Connecticut United for Research Excellence Inc.	North Carolina State University College of Veterinary Medicine
Department of Health and Human Services	North Carolina Veterinary Medical Association
Duke University Medical Center	Pennsylvania Society for Biomedical Research
East Carolina University	Society of Toxicology
GlaxoSmithKline	University of North Carolina at Greensboro
Florida State University	Wisconsin Association for Biomedical Research and Education
Foundation for Biomedical Research	
Howard Hughes Medical Institute
